

VIRTUAL
COURSE

University of Oxford Course on Systematic Reviews & Meta- Analyses

24–26 January, 2022

Course Director: Andrea Cipriani

Tutors: Anneka Tomlinson, Franco De Crescenzo, Edoardo Ostinelli

This **online course** is open to anyone, but it is specifically designed for psychiatrists, psychologists, mental health professionals, mental health pharmacists and neuroscientists with an interest in evidence synthesis and evidence-based practice.

Features include an engaging programme of lectures, hands-on tutorials, group discussions and supervised statistical sessions on systematic reviews and meta-analyses of RCTs.

Topics covered: Protocol, search strategy, basic concepts on statistical analysis of RCTs, study selection, risk of bias, reporting of results (PRISMA Guidelines), performing a meta-analysis (theory and practice with Review Manager, R and STATA), paper submission, and practical project presentation.

Course Fees

3 Days Standard £600

3 Days Discounted £550

(Discount applies to: PhD students, NHS trust and University of Oxford employees)
