University of Oxford Course on Systematic Reviews & Meta-Analyses

28 & 29 January, 2021
05 March, 2021

New
Format!

Course Director: Andrea Cipriani

Tutors: Anneka Tomlinson, Franco De Crescenzo, Edoardo Ostinelli

Course Coordinator: Katherine Stevens

This **online course** is open to anyone, but it is specifically designed for psychiatrists, psychologists, mental health professionals, mental health pharmacists and neuroscientists with an interest in evidence synthesis and evidence-based practice.

Featuring an engaging programme of lectures, hands-on tutorials, group discussions and supervised statistical sessions on systematic reviews and meta-analyses of RCTs.

New format! This 2+1 Day Course, includes two teaching days, plus an engaging virtual networking session, followed by a feedback day entirely dedicated to discussion of delegates' projects and how to publish them.

Day 1: Protocol, Search Strategy, Basic Concepts on Statistical Analysis of RCTs, Study Selection, Risk of Bias, Reporting of Results (PRISMA Guidelines).

Day 2: Performing a meta-analysis (theory and practice with Review Manager and STATA), Paper Submission.

Day 3: An opportunity for delegates to present their projects for constructive feedback from the Course Director, tutors and peers, and see the work of others. *Slots are a maximum of 30 minutes, available for sign up on registration.*

2 Days Standard £500

2 Days PhD Students, NHS trust and university employees £450

3 Days Standard £600

3 Days PhD students, NHS trust and university employees £550
